

注意

es6.5不可使用root作为启动用户，java版本需要1.8及以上

添加用户:

```
groupadd elastic
```

```
useradd elastic -g elastic
```

```
echo "elastic" | passwd --stdin elastic
```

添加用户到sudo组:

```
vim /etc/sudoers (0440)
```

```
elastic ALL=(ALL) ALL
```

配置:

```
vim /etc/security/limits.conf
```

```
maxfile 65536
```

```
java_home
```

```
jvm
```

权限:

```
chown -R elasticsearch esdata
```

```
chown -R elasticsearch log
```

安装 :

```
sudo rpm -ivh elasticsearch-6.5.4.rpm
```

添加服务

```
sudo /bin/systemctl daemon-reload
```

```
sudo /bin/systemctl enable elasticsearch.service
```

破解xpack :

https://blog.csdn.net/qq_29202513/article/details/82747798

启动 :

```
sudo systemctl start elasticsearch.service
```

设置密码：

```
bin/elasticsearch-setup-passwords interactive
```

默认密码：

```
elastic/changeme
```

安装kibana:

上传证书
